

JOB DESCRIPTION

POSITION TITLE:	Project Engineer	LOCATION:	Star, Idaho
REPORTS TO:	Project Manager	POSTED:	April 25, 2025

Wright Brothers, The Building Company is seeking a highly motivated and detail-oriented Project Engineer to support the successful delivery of commercial construction projects. This role serves as a critical link between the field and office, assisting with communication, documentation, and coordination throughout the project lifecycle. The ideal candidate is a proactive team player with strong technical skills and a passion for construction excellence. This role is a launchpad to advanced project leadership roles such as Superintendent and potentially Project Manager

Project Engineer Duties

- Support the Project Manager in coordinating all phases of construction projects from pre-construction to closeout.
- Assist with schedule management, submittals, RFIs, procurement, and document control.
- Maintain drawing logs, specifications, and ensure field teams have the most current project documentation.
- Review and analyze subcontractor submittals and shop drawings for compliance.
- Coordinate with architects, engineers, subcontractors, and suppliers.
- Monitor and track project costs, change orders, and budget compliance.
- Support construction site operations by resolving issues and expediting materials and information.
- Prepare and distribute meeting agendas, notes, and status updates.
- Ensure project documentation is accurate, timely, and compliant with internal and regulatory standards.
- Collaborate with field staff to maintain quality assurance and site safety protocols.
- Participate in project closeout, including punch list tracking, O&M manual compilation, and warranty documentation.
- Performs other duties and responsibilities as needed.

Qualifications, Knowledge, Skills & Abilities

- Bachelor's degree in Construction Management, Engineering, or related field preferred.
- 1-3 years of experience in construction or a related industry preferred; internship experience will be considered.
- Strong understanding of construction processes, materials, and documentation.
- Excellent communication, organizational, and problem-solving skills.
- Proficient in Microsoft Office Suite; familiarity with Procore, Bluebeam, and scheduling software a plus.
- Ability to read and interpret construction drawings and specifications.
- Strong sense of urgency and ability to manage multiple priorities in a fast-paced environment.
- Highly collaborative with the ability to work effectively with cross-functional teams.
- Eagerness to learn, grow, and take ownership of project success.
-

WHY WRIGHT BROTHERS?

Be part of a company with a rich history and commitment to community.

Engage in diverse and challenging projects across various sectors.

Collaborate with a dedicated team focused on total project success.

Opportunities for professional growth and development.

Competitive benefits

Required Experience

- Proven experience in the construction field.
- Strong knowledge of construction management principles and practices.
- Familiarity with construction industry standards, codes, and regulations
- Ability to coordinate multiple priorities.
- Strong communication and collaboration skills.
- Ability to read and interpret project plans, specifications, and other technical documents.
- Excellent organizational skills and attention to details.

Note: Experience with specific construction methods or materials may be required depending on the nature of the projects. We offer competitive pay rates and benefits package. If you have a passion for construction supervision and are looking for a challenging role, we encourage you to send your resume and a cover letter to hiring@wbnation.com.
